

GREATER SAN ANTONIO THE CITY OF DESTINY AND OF YOUR DESTINATION

The Power of Pictures

One picture is worth ten thousand words. From the earliest times man has employed the power of pictures to express his thoughts simply and directly. The pictorial instinct of mankind is one of the strongest and most universally persistent. Pictures speak in all languages, and in many instances, they can be made to carry a story, which it is impossible to convey by words. People see and understand pictures, long before they can read or write.

Yours Truly,

TO OUR SUBSCRIBERS:

In handing you this copy of "Greater San Antonio, the City of Destiny and of Your Destination," for 1918, we do so hoping that you will note the improvements made over previous issues, and that you will give us some practical suggestions for additional improvements which we can embody in the next issue.

It is our aim to make this Co-operative Publicity Book a ready reference for anybody interested in the San Antonio district or its possibilities. Any criticism which will enable us to improve the next edition will therefore be welcome.

E. A. LUCK, Director of Publicity
Basement Gibbs Building
San Antonio, Texas

This Book and Plan of Co-operative Publicity has been endorsed by the leading Civic bodies of San Antonio and the subscription list among large business firms and individuals is growing very rapidly.

SECOND EDITION

CITIZENS OF SAN ANTONIO

Higher Publicity is the real yeast in the bread of improvement and a never failing factor for good results. Joining this movement is like throwing away the canoe paddles and getting aboard a steamboat.

It has been said that "One single idea may have greater weight than the labor of all the men, animals and engines for a century," and the idea of the Higher Publicity League of Texas belongs to that class.

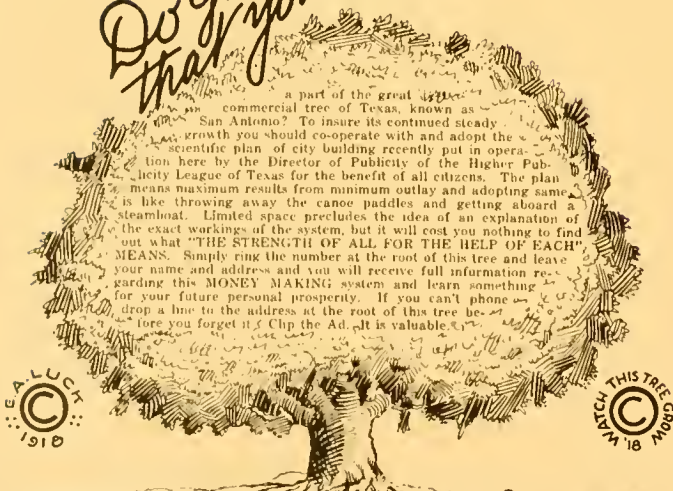

The "Greater San Antonio" book of facts and figures with four thousand dollars worth of copper plates picturizing San Antonio, has been compiled and is now ready for distribution by subscribers, to be placed on the reading tables of all Commercial Clubs and Civic Bodies throughout the United States and Canada. Get Radio-active—become a "LIVE WIRE" and send a few of these HIGHER PUBLICITY BOOKS to your "SNOW-DIGGER" friends up north, with a personal invitation to visit San Antonio for rest, recreation, business, pleasure or investment. Let's make the circulation Nation-wide and watch San Antonio G-R-O-W. OBEY THAT IMPULSE NOW, RIGHT NOW—WRITE NOW.

Yours for results,

Higher Publicity League of Texas,

By E. A. LUCK, Director of Publicity.

*Do you know
that you are*

BUILD UP THE HOME TOWN

If you want to live in the kind of a Town—

Like the kind of a Town you like,

You needn't slip your clothes in a grip

And start on a long, long hike.

You'll only find what you left behind,

For there's nothing that's really new;

It's a knock at yourself when you knock your town—

It isn't your Town—it's you!

Real Towns are not made by Men afraid—

Lest somebody else gets ahead.

When everyone works and nobody shirks

You can raise a Town from the dead.

And if while you make your personal stake,

Your neighbor can make one, too,

Your town will be what you want to see—

It isn't your Town—it's YOU!

Anon.

The above is a newspaper ad for the Press of San Antonio; but it is also used in conjunction with business cards and folders of various firms and individuals of the city. See E. A. Luck about this

INTRODUCTION

The purpose of this book is to present to the general public, the tourist and investors of foreign states a synopsis of reliable information covering the many attractions and opportunities offered by SAN ANTONIO, "THE CITY OF DESTINY AND OF YOUR DESTINATION."

To let the country know that San Antonio is a modern, yet picturesquely interesting, historically enthralling—yet up-to-date city. To let the tourist know that every luxury known to the dweller of the Nation's greatest cities may be found here, while the visitor enjoys what other cities cannot give: Latin - American settings in distinctly foreign quarters, the Alamo and the Missions, beautiful in their ruins, telling of the days of Empire-making two centuries ago, when the cross and the sword went together into the wilderness to bring civilization to the savage race.

The object of the compiler has been to place into concrete form all available information and

facts about San Antonio and its environments so as to make same easy of assimilation among all classes of people residing in less favorable sections who are looking toward San Antonio as a possible future home. Securing maximum efficiency with a minimum

of space and verbiage has been made possible by combining the judicious use of the camera and the pen. Suffice it to say, San Antonio offers the last chance of the century to get in on the ground floor of the development of one of America's great population centers. Here nature has done more than her share to make rapid development and ideal homesites possible. The process of building a great metropolis has been set in motion in San Antonio and it is no wonder that men with foresight, enthusiasm, capital, energy and skill have planned greater San Antonio and are working their plan. "THE STRENGTH OF ALL FOR THE HELP OF EACH," is their slogan.

CITY HALL, SAN ANTONIO

THOUGHTLETS

Don't put your name down and your money up,
and then let go.
Catch hold firmly and pull with the rest.
Get under and lift; don't be a leaner.
Don't be a kicker or a knocker.
Don't be a drone or a figurehead.
Give your home stores a chance.
Be a real, red-hot enthusiast.
Help your own town first.

—WILMOT

Somebody said that it couldn't be done,
But he, with a chuckle, replied:
That "maybe it couldn't," but he would be one
Who wouldn't say so till he tried.
So he buckled right in, with the trace of a grin
On his face. If he worried, he hid it.
He started to sing as he tackled the thing
That couldn't be done—and he did it.

Skyline
San Antonio, Texas

SAN ANTONIO FACTS

We present these facts as concisely as possible and ask that you use your own good judgment and clear system of analysis as to what bearing they have on the future of San Antonio

Present population, 145,000.
Area (corporate limits), 36 square miles.
Commission form of City Government.
Assessed valuation in 1917, \$109,971,392.
Altitude above sea level, 659 to 810 feet.
Average annual rainfall, 26.83 inches.
Mean summer temperature, 82 degrees.
Mean winter temperature, 54 degrees.
Average velocity of wind, 7.4 miles per hour.
Proportion of rainy days to fair, 1 to 5.
Finest artesian water supply in America.
Capacity of pumping plant, 50 million gallons daily.
Daily average consumption of water, 14 million gallons.
Many hotels and industrial plants own private artesian wells.
Tax rate—City, \$1.70; School, \$0.45; State, \$0.60; County, \$0.55.
Building permits 1917, \$3,500,000.
Bonded indebtedness, \$5,378,000.
Number of banks, 15; total deposits, \$34,202,930.00.
Postoffice receipts, 1917, \$678,663.24.
Fire department, 150 paid men; lowest key rate in State—14 cents.
Number of public buildings, 18.
Secret societies, 129.
Metropolitan street car system, 100 miles of track.
Modern telephone system (Bell), 18,000 telephones.
Newspapers: 4 dailies, 12 weeklies, 3 monthlies.
Railroads: 5 trunk lines and 5 branch lines.
Modern gas and electric system.
Medicinal wells and baths, 7.
Parks and plazas, 24.
Number of bridges crossing San Antonio River, 86.
Central market house and market plaza.
Hospitals, 7.
Miles of new street pavement, 115.
Manufacturing industries, 236; annual production, \$35,000,000.
Tourist cottages and bungalows, 3750.

Churches of various denominations, 68.
Public schools, 35; value of public school property, \$2,000,000.
Number of teachers, 540; scholastic population, 31,733.
Private schools, 45, representing an investment of two million dollars.
Modern hotels, 11.
Largest Army Post in the United States; area 3500 acres; investment, seventeen million dollars.
Area of target range, 18,000 acres.
Value of farm and stock products of San Antonio territory, \$65,000,000 annually.
Annual wholesale trade, 100 million.
Population of San Antonio's trade territory, 884,150.
Value of cotton raised in San Antonio territory in 1917, \$80,000,000.
Miles of improved wagon and automobile roads, 5130.
Less than 15 per cent of the agricultural lands are developed.
San Antonio is in the midst of the richest agricultural district in Texas (as large as the States of Ohio, Massachusetts, New Jersey, Connecticut, Rhode Island and Delaware, a total area of 43,529,600 acres), and is the gateway to commercial Mexico.
In wealth of raw material and undeveloped resources, it offers great opportunities for new industries, distributing houses and colonization projects.
This is the last of the great partly developed areas of good land.
Number of automobile licenses in San Antonio, 14,500.
Suburban irrigated gardens produce roasting ears for Christmas.
Three of the four railroads entering Mexico from the United States radiate from San Antonio.
“The Strength of All for the Help of Each,” is our slogan. We are here to help each other, and only through co-operation do we grow. **THEREFORE, PULL TOGETHER FOR A GREATER SAN ANTONIO.**

THE BOOSTER'S ROOST

KNOCKER vs. BOOSTER

Some one has said that when the Creator had made all the good things, there still remained some work to do, so He made beasts and reptiles and poisonous insects, and when He had finished there were some scraps left, so He put all these together, covered them with suspicion, wrapped them with jealousy, marked them with a yellow streak and called the result a "Knocker."

This product was so fearful to contemplate that He had to make something to counteract it, so He took a sunbeam, put it in the heart of a child, the brain of a man, wrapped these in civic pride, covered them with brotherly love, gave them a mask of velvet and a grasp of steel, and called the result a "Booster;" A BELIEVER IN EQUALITY AND JUSTICE. Ever since these two were made, mortal man has had the privilege of choosing his own associates.

RESIDENTIAL SAN ANTONIO

Surely San Antonio is awakening and is beginning to see some little distance into the future so filled with bright prospects that even the dreamers cannot overrate the possibilities. Here ancient land marks are rapidly giving way to structures like those herein illustrated.

To those who have failed to watch the progress and development of the great resources of Texas in the last fifteen or twenty years can form but little conception of the immense possibilities there are for the creation of a great Metropolis at San Antonio.

It has the necessary elements which go to make it the great center of finance, manufacture and commerce of South Texas.

There is no element of boom in real estate. Values seem to be certain and permanent, whether it be in the heart of the city, or on its residence section.

When one contemplates the wonderful productiveness of the soil in the great territory surrounding and adjacent to San Antonio, one cannot help being convinced that values will, before the end of the present decade, increase with leaps and bounds.

Residence E. R. Guenther.

FARM FACTS.

The wonderful potentiality of the South Texas soil and climate is known and proven. Scientific farmers have discovered it. Here lies one of the largest pockets of fertile soil in the known agricultural world. It is the concentrated essence of fertility. The accumulated humus of centuries. It contains all the elements of plant food in the right proportion and in assimilable condition for all plants to easily derive their food during the period of growth. Everything considered, there is no part of the United States to be compared to the fertile regions of the San Antonio territory and everything points to this district as the coming center of agricultural and horticultural activity.

The following pictures will give an idea of the great variety of farm crops raised here by dry farming as well as by irrigation.

Opportunities for Good Investment in San Antonio

"San Antonio in particular and Southwest Texas in general offer most inviting opportunities for investment at this time," says the bulletin of the Real Estate Board. "Our unique and fortunate position as a great agricultural center, as the Gateway to Mexico and as the winter playground of the Central North certainly places us in the front rank as a place to make a home and fortunate investments."

"Farming opens up the most extensive field. With 20,000,000 acres of fine agricultural land undeveloped in this territory, there is no estimate to the growth that can take place along these lines. South Texas, with its abundant sparkling waters, its rich grasses and cheap roughage, promises to become a premier dairying country. We have proven beyond a doubt that we can grow feed stuffs more abundantly and cheaply in this section than any other, furthermore we can feed live stock more cheaply as we have practically all year grazing and the advantage of saving large sums of money in providing shelter. Besides this, we have cotton, hogs, poultry and truck products, for which San Antonio offers the finest market."

CLIMATE MAKES LAND VALUES

The real, bed-rock reason for land values, measured from the standpoint of productiveness, is climate, for climate is the one great fixed and unchangeable factor in production.

A good part of the farming of the world is not yet adapted to its climate; many branches of agriculture are being carried on in the wrong climate. To adapt itself to climate is the greatest problem of agriculture. The high cost of living will be reduced when this problem is solved.

You can change and even make soil, but you cannot in any way alter climate.

Whenever a man buys a patch of land, he gets a bunch of climate along with it—whether he wants it or not.

If productiveness fixes land values, climate determines both the possibility and degree of production.

On the lands in the Northern States, farmers, if they are lucky, make one crop a year. What is the trouble? THE CLIMATE.

The climate that goes with the land of the Northern States is of the sort that limits production to a few months of the year, while the climate that goes with the land of the San Antonio territory is such as to make production possible every month of the year.

MARKETING

There are being put in operation in the San Antonio territory many large farm projects to place under cultivation many thousand acres of land. Out of their knowledge of our soil, water supply, climate, environment, markets and general conditions, northern farmers are choosing the San Antonio district for their future operations.

—Courtesy Huth Seed Company.

To the Man Who Can Look Ahead

San Antonio Has Been Hiding Its Light Under a Bushel, but Men of Foresight, Enthusiasm, Capital, Energy and Skill Have Discovered Its Many Attractions and Have Set in Motion Here the Process of Building a Metropolis and a City of Homes.

History repeats itself—San Antonio will be to Texas and the entire Southwest what Los Angeles is to California and the West coast.

Not so many years ago Los Angeles was nothing but a village of eleven thousand people—mostly Mexicans. Today she is the commercial metropolis as well as the playground of California, with a population of over six hundred thousand.

In San Pedro Park.

You who can glimpse into the future, those of you who do not live in the present, cannot fail to see the hand-writing on the wall.

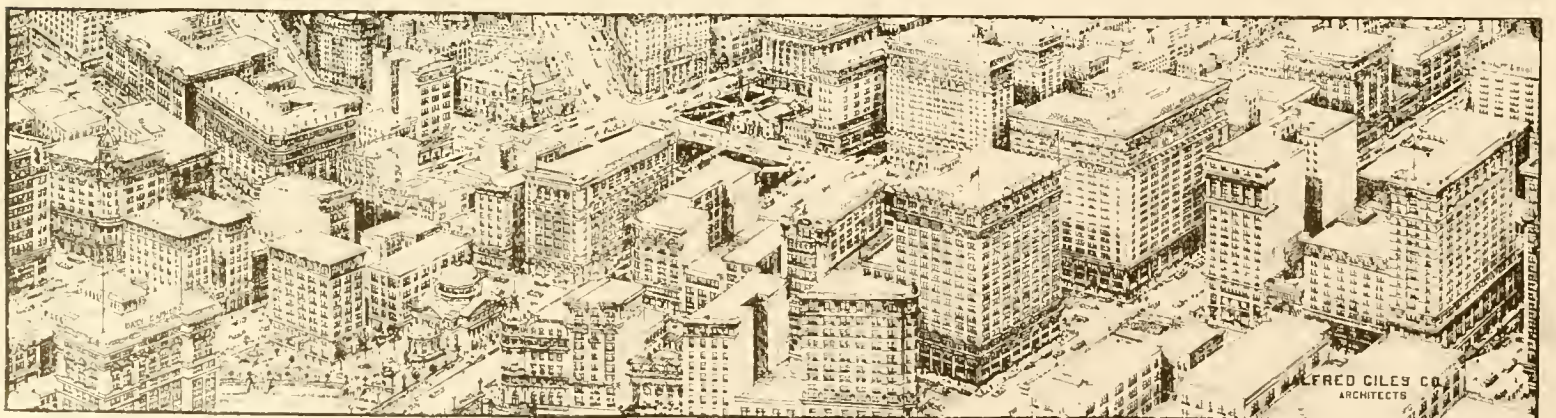

The San Antonio territory is recruiting thousands of men annually who are making wonderful developments, and a few years hence there will be plenty of men on the street of San Antonio to say: "A FEW YEARS AGO I COULD HAVE BOUGHT PROPERTY IN THE BEST SECTIONS OF THIS OLD TOWN FOR A FEW HUNDRED DOLLARS THAT WOULD HAVE MADE ME RICH."

"He who lives within the sound of the cataract is unconscious of its roar." The native Texan is in this very fix, as he is in the midst of what seems commonplace to him and he fails to grasp the red ripe opportunity which the newcomer from the North so quickly sees after he investigates.

Men who have been close students of affairs in Texas have always predicted that there was to be built, somewhere in South Texas, a great city, but where was the question. No sooner had the great Resort Hotels of San Antonio become known and the Four Million Five Hundred Thousand Dollar bond issue for street improvements been sold than they said: "THIS IS THE PLACE."

The agricultural Empire back of San Antonio is one of the reasons. The Panama Canal is another reason, while its wonderful climate, strategic location as the gateway to commercial Mexico and the fact that it has an unlimited supply of the finest artesian waters are still other reasons.

San Antonio stands today as Los Angeles did a few years ago. Men of small means could then get a foothold that has counted into the millions since, and the same opportunity is presented in San Antonio today. Investments in combination Commercial Cities and all-year-round-resorts have always brought enormous profits, and these profits San Antonio now invites all comers to share in.

Alfred Giles' Dream of the Future Skyline of San Antonio from Alamo Plaza as a Center.

Illustrated by Herbert S. Green.

The Process of Building a Metropolis Has Been Set in Motion Here

and it is no wonder that men of foresight,
enthusiasm, capital, energy and skill are
taking advantage of this red ripe opportunity

Remember the great Canal which divides a Hemisphere and unites a world means more than we can tell to the farm land and industrial propositions of the San Antonio district which is in close proximity to the Gulf Harbor of Port Aransas and contiguous to the largest trade basin of the five great natural divisions of the United States now accessible to ocean ships. It marks the mightiest change in the world's material affairs since the discovery of America. The South Texas coast will be close to all the markets of the world. What Commodore Maury predicted for the Gulf of Mexico fifty years ago is about to come true. He declared that the breaking down of the barriers between the Atlantic and Pacific would focus the world's commerce in the Gulf of Mexico.

If we could conceive of the creation of a new world which overnight was joined to the earth, with a population equal to half that of the Globe—a new world with 800,000,000 people ready to enter actively into the broadest business development—the opportunities for people of this particular section to do business with the newly made world would not be greater than the opportunities which have been brought into existence by the opening of the Panama Canal and the development of the largest inland water system on the continent—the Inter-coastal Canal having its longest coast line in Texas.

San Antonio's share in these vast opportunities will no doubt be great, on account of the stupendous tonnage which can be produced on the rich lands tributary to it. The San Antonio territory is the section where the quickest and biggest results following Harbor developments at Port Aransas will be shown—that is clear. People who can look ahead should by all means look into the San Antonio proposition and that now is the time to do so is very evident.

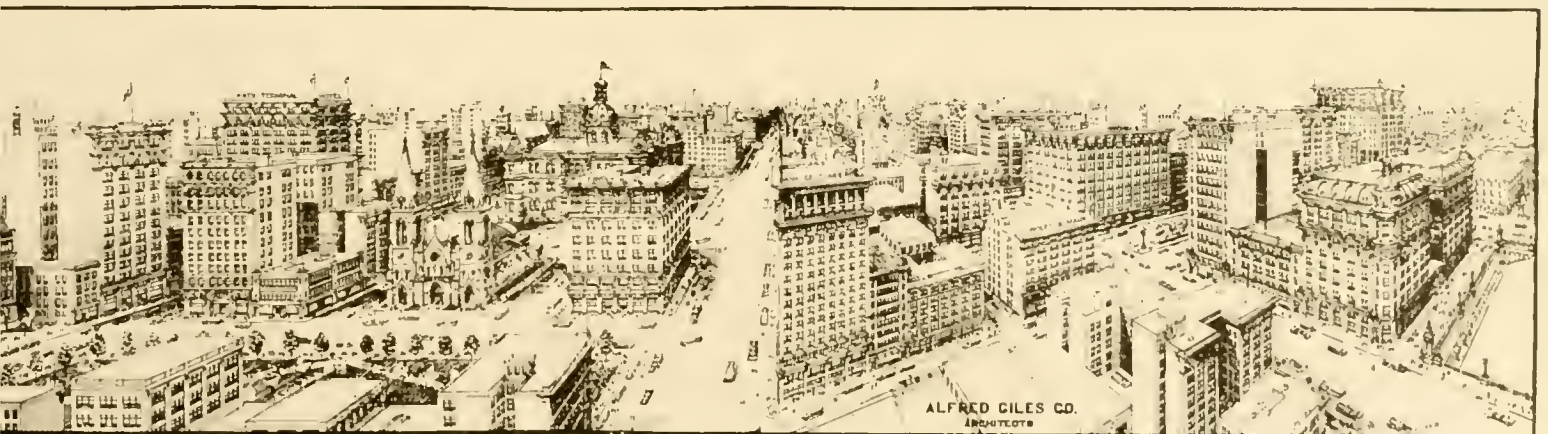

The far-sighted man can see that the next focus of great development is here and that history is bound to repeat itself at San Antonio. For the many reasons look carefully over the pages of this publication and write to the **HIGHER PUBLICITY LEAGUE OF TEXAS** for more facts before you accept the invitation to become a citizen of San Antonio, **THE CITY OF DESTINY AND OF YOUR DESTINATION.**

In Brackenridge Park.

COMMERCIAL AND INDUSTRIAL

The day was, and not so many years since, when San Antonio was a frontier city, the half-way house between the effete East and the cow boy and sombrero-covered hidalgo of Mexico. Today it is one of the prosperous and constantly growing cities of the Southwest, the center of a great trade, and a distributing point of splendid dimensions.

Over two hundred industrial plants have established a most respectable pay roll. Up-to-date business houses show

retail products equally up-to-date, comparing favorably with the shops of the biggest cities of the country.

The jobbing or wholesale houses are equally alert and progressive in their various lines, they being thoroughly representative and operating in a territory as large as the State of Ohio.

THE WHOLESALE TRADE OF THE CITY IS VALUED AT \$100,000,000 ANNUALLY.

A CITY OF SENTIMENT

It is a city of sentiment, of material development, of wealth, of industrial accomplishment. It possesses every feature and concomitant of a strenuous and up-to-date civilization, as manifested by its wonderful natural advantages and commercial development. Its parks, roadways, streets, buildings, climate, environments and above all, its citizenship, conspire to create an entity that is alluring in the extreme, and which offers every advantage to the individual seeking the pleasures of a handsome resort city or the opportunity of becoming profitably identified with its business life and a part of the one hundred and forty-five thousand souls who now live within its rapidly extending confines.

UNDER SIX FLAGS

San Antonio has witnessed the winds flaunt the flags of six governments to the heavens—the insignia of Spain, the Lily of France, the Serpent of Mexico, the Star of Texas, the Bars of the Confederacy, and the Stars and Stripes of a united country. History, tradition, love and veneration, have each contributed to the development of San Antonio, which today, while no less inspired by a wonderful record, throws open its doors and invites the world to lift the latch string and partake of its always generous hospitality and welcome, and that within a metropolis which typifies enterprise, energy, progress and man's attainment.

Tabloid History of San Antonio

San Antonio was first settled in 1689 by the Spaniards, under a charter issued by Ferdinand III of Spain, which named the town San Fernando. In those early days it was the frontier post of civilization and the struggle between the two civilizations ebbed and flowed with the white man pushing the savage back farther and farther into the wilderness. In 1776 the French, under St. Denis and Laharpe, attacked the city, but were defeated by the Spaniards. Early in the nineteenth century Americans in great numbers came to Texas and into San Antonio, which was even then known as a great health resort. In the fullness of time rebellion against Mexican rule grew into armed revolt, and the Americans assumed power in San Antonio after the battle of Concepcion, in which they were victorious, October 28, 1835. When the Texans marched out to defend other parts of Texas the Mexicans once more gained control of the city, but in the battle of December 5, 1835, in which Ben Milam was killed, San Antonio was taken by the Texans. Then followed the defense of the Alamo, which ranks with the defense of Marathon and the charge of the Light Brigade at Balaklava.

This heroic sacrifice was not in vain. When the news of it spread through Texas, men rushed to arms to avenge the death of their countrymen. How General Santa Anna marched from San Antonio to the battlefield of San Jacinto, where on April 21, 1836, he was utterly overwhelmed by General Sam Houston and the Texans, is a matter of general history. Thus San Antonio became the cradle of Texas Liberty, and the sacred Alamo the shrine of heroism that will be revered as long as patriotism and courage and manhood have any worth in the world.

In view of her many attractions, is it any wonder that Americans, quick to see and to seize opportunities, are pouring into San Antonio, with capital, energy, enthusiasm and skill? The magnificent developments of the past few years, and the wonderful increase of tourists into San Antonio since the construction of her palatial Hotels, have earned for her the name, "Old-New Pearl of the Continent."

San Antonio has witnessed the winds flaunt the flags of six governments to the heavens—the insignia of Spain, the Lily of France, the Serpent of Mexico, the Star of Texas, the bars of the Confederacy, and the Stars and stripes of a united country. History, tradition, love and veneration, have each contributed to the development of San Antonio, which today, while no less inspired by a wonderful record, throws open its doors and invites the world to lift the lath string and partake of its always generous hospitality and welcome.

Proclamation

TO THANK BUSINESS MEN at a distance for their patronage during the past and to show them the resources and facilities that we hold in readiness to supply their present and future needs, is our purpose in this proclamation.

THEREFORE, we desire to proclaim through these pages that no city in America is more advantageously located than San Antonio and her commanding position in the distributing and financial world makes her the logical city to lead in Texas commerce. Her transportation facilities are good. Her manufactured products are sold throughout a large trade territory. Her wholesale houses are covering more territory than ever before. Her banking houses are sound, liberal and reliable. Her real estate men are active. She is a great convention city and her hotels rank among America's finest. Her retail stores are heavily stocked with every ware from everywhere.

Now these things being true, we, the business men of the city, believe this an opportune time to proclaim to the world the advantages that San Antonio offers, and in evidence of our belief and purpose we herewith affix our signatures.

CARRANZA SOLICITA UN NUEVO PERMISO PARA OBTENER CINCUENTA MILLONES MAS

Y MIENTRAS HACE ESAS GESTIONES FINANCIERAS, SIGUE INCAUTANDOSE DE LOS BANCOS DE NUESTRO PAIS

Envío otra demanda al Congreso pidiendo autorización para contratar un empréstito por la suma antes dicha

CABRERA HARA LAS GESTIONES EN N. YORK

México no se verá afectado por el embargo de comestibles pero subsistirá el de las mercancías

Telegrama Especial para LA PRENSA

Ciudad de México, Julio 10.—El jefe del ejecutivo, Venustiano Carranza, ha pedido al Congreso, por conducto de la Secretaría de Hacienda, autorización al congreso de la Unión para negociar otro empréstito por valor de cincuenta millones de pesos oro nacional. Así pues, el total de la cantidad que desea obtener el presidente de la República es de doscientos millones de pesos oro nacional, pues hace muy pocos días pidió al congreso autorización para negociar un empréstito por ciento cincuenta millones.

En su solicitud, el señor Carranza expresa al congreso que los cincuenta millones del empréstito adicional los dedicará exclusivamente a la reconstrucción de las vías ferroviarias del país, y a comprar material rodante para reponer una parte del que ha destruido la revolución.

CABRERA HARA LAS NEGOCIACIONES EN NUEVA YORK

Telegrama Especial para LA PRENSA
N. Y., N. Y., Julio 10.—Telegrama informando que el Venustiano Carranza ha pedido a la cámara de diputados autorización para contratar un empréstito adicional por valor de cincuenta millones de dólares. Se dice en los círculos financieros de esta ciudad que tan pronto como el congreso mexicano autorice a Carranza para negociar el empréstito que pretende, saldrá para esta ciudad el licenciado Luis Cabrera, a quien el jefe del ejecutivo de México considerará que lleve a cabo las negociaciones con los banqueros neoyorkinos.

UN TIROTEO A TRAVES DE LA LINEA DIVISORIA

EL PASO, Tex., Julio 10.—Cinuenta disparos fueron hechos por unos mexicanos que cruzaron la frontera en Harts Mill, una milla al Norte de la Estación Unión, entre 9 y 10 de la noche pasada. El fuego fue contestado por una patrulla del ejército que estaba de servicio en el estado punto y no se sabe si resultaron algunas bajas entre los que cruzaron el río. Algunos oficiales del ejército creen que el repentino fuego que hicieron los mexicanos tuvo por objeto distraer la atención de las autoridades mientras pasaban algunos contrabando por algún punto más arriba del río.

DESPRENDIMIENTO DE UN

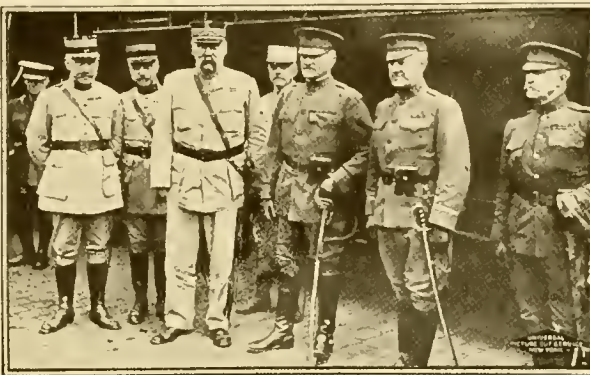

SAN FRANCISCO, Cal., Julio 9.—

Un joven griego que respondió al nombre de Juan Lampas, condujo ayer a la Cruz Roja su automóvil de gran turismo, su magnífico cromomoto de oro, un cheque por \$521, por su reputación en un banco, y \$25 que traía en efectivo.

Habiendo cedido a la Cruz Roja según dijo, todo lo que poseía, resolvió darse de alta en el ejército, cosa que hizo en el acto.

"Esto es todo lo que poseo,—dijo— con guño lo doy."

EL GENERAL JOHN J. PERSHING EN FRANCIA

Uno de las mejores fotografías que han sido tomadas del jefe de las fuerzas americanas que van a combatir por la causa de la democracia en Francia: rodeado de altos jefes de los ejércitos francés e inglés.

Algunos malos elementos hicieron fracasar la organización de los obreros mexicanos

EL ING. DE LA FUENTE HACE UN RELATO DE LA PARTICIPACION QUE TUVO EN EL ASUNTO

Durante la tarde de ayer, empezaron a rendir sus declaraciones, ante el representante en San Antonio de la autoridad federal, Mr. Barnes, los obreros que mostraron el movimiento de unión entre los trabajadores mexicanos, y que fueron aprendices, según dijimos, la tarde del último sábado.

Poco tendremos que decir sobre ellas, pues nuestros lectores están enterados, por las informaciones que a nuestra redacción trajeron los mismos obreros, y que, tal cual nos las dieran, transmitimos a nuestro vez al público, de como, poco antes de que fueran principio las grandes obras de construcción de los asentamientos en León Springs y Campo Wilson, algunos trabajadores llevaron a un grupo numeroso de sus compañeros, a la idea de formar una sociedad que, eligiendo un comité directivo, pudiera tener personalidad para tratar con los patrones, en este y en todas las cosas, lo cual serviría de mucho, siempre que fuera inspirado en buenas intenciones, tanto a obreros como a contratistas.

Se hicieron algunas sesiones preliminares y se citó a una definitiva para la tarde del Domingo, sesión que no pudo efectuarse tal y como estaba anunciada, por la aprehensión de los directores de la agrupación, de orden del Departamento de Investigación.

El Ingeniero David de la Fuente

Cuando dimos cuenta de que los obreros, han encarrilado y normalizado su labor de unión, dijimos que ellos contaban con la ayuda del Ing. David de la Fuente.

Según la comisión de obreros nos comunicó, fué el mencionado Ingeniero, quien se acercó a uno de los artesanos empleados de la casa contratista en campo de las obras de las avanzadas de San Antonio, y por conducto suyo, unieron los obreros lo que la compañía había fijado como salario, así como las horas de trabajo.

Sabedores de la participación que el Ing. de la Fuente había tenido en este asunto, nos encaminamos ayer a su

casa, para explicarle sus dichos en que habían constituido su actuación, y cuáles eran las ideas que los obreros unionistas le habían expuesto.

Con su amabilidad de siempre habiéndonos recibido y de prestarse gustoso a nuestro breve interrogatorio.

LA CONVENCION DE SHERIFFS INICIO AYER SUS SESIONES

Todos los Condados de Texas están representados en esta interesante reunión

Algo de historia acerca de los servicios que han prestado los sheriffs y de los principios de la Asociación

Una de las más interesantes, entre las muchas convenciones que en el transcurso de algunos meses, se han venido verificando en esta ciudad de San Antonio, es la que inició ayer sus sesiones, con entusiasmo y concurrencia grandísima, en el Salón de Baile del Hotel Gunter.

Nos referimos a la Convención de Sheriffs del Estado de Texas, de cuya celebración habíamos hablado en números anteriores, y cuyas sesiones, que, como decimos, dieron principio ayer, terminarán el día doce de los corrientes.

Dos días hace que empezaron a llegar a San Antonio los Sheriffs de los condados texanos, y para la mañana de ayer, todos, con muy pocas excepciones, motivadas por enfermedad o urgencias inaplazables, se encontraron en el Salón del Gunter.

La Asociación de Sheriffs de Texas.

Ha estado a esta convención, una de las más respetables agrupaciones de Texas, sino por el número de sus asociados, que es reducido, por su significación en la vida de la entidad.

La asociación se llama "Asociación de Sheriffs del Estado de Texas", y fue fundada, hace treinta y nueve años, por el Diputado Sheriff de Austin, no previendo nadie entonces la importancia y la duración que llegaría a tener.

Ya entonces—esto pasaba en el año de 1877—Sheriff del Condado de Travis, Mr. Irené Corren, y su ayudante, Mr. John P. Kirk.

Este último pensó que una agrupación de los Sheriffs de Texas, se

Por orden expresa del ex-Primer Jefe fue despojado de sus fondos el Banco Mercantil de Monterrey

EL GERENTE Y EL CAJERO ENCARCELADOS

Nada valieron las protestas de los empleados del mencionado Banco para evitar el atentado

La desesperada situación económica en que se encuentra el gobierno de Carranza, ha tenido oportunidad de manifestarse nuevamente, y de un modo elocuente, con la incautación del Banco Mercantil de Monterrey, decretada por el ex-Primer Jefe y llevada a cabo por los miembros del Consejo de Incautación del día último del pasado mes de junio en la ciudad de Monterrey, del Estado de Nuevo León.

Cómo se efectuó el despojo

Por datos que pudimos recoger sobre el particular, sabemos que el gobierno del Centro, urgido de dinero para pagar a la tropa y a los empleados civiles, ordenó al Consejo de Incautación de Monterrey, que solicitara de los funcionarios del Banco Mercantil la entrega inmediata de determinada cantidad de metálico, que urgía para el pago de los haberes del ejército.

Las personas que integran este Consejo, que son las mismas que se incautaron de los fondos del Banco de Nuevo León hace ya algún tiempo, se presentaron a las oficinas del Banco Mercantil, en cumplimiento de las superiores órdenes de don Venustiano, exigiendo que se les facilitara la suma requerida por el ex-Primer Jefe.

Los empleados se niegan

Al igual que los empleados del extinto Banco de Nuevo León, los del Mercantil se negaron, con toda decencia, a acceder a los deseos de los peticionarios, diciendo que no entraba dentro de sus atribuciones disponer de los fondos depositados en las cajas del banco, por ser de propiedad del ejército.

(Pasa a la 6a. Col. 7a.)

BATIDA CONTRA LOS AGITADORES EN JEROME

JEROME, Ariz., Julio 10.—Un numeroso grupo de mineros y ciudadanos armados con rifles y picas, emprendieron esta mañana, a la madrugada la tarea de limpiar el pueblo de agitadores, a los cuales consideran como gente poco deseable en cualquier centro de trabajo. Esta acción no fue otra cosa que el resultado de una huelga promovida el viernes por los miembros de la Asociación "Trabajadores del Mundo".

Un pasado azaroso

Algunos a quien a este respecto entrevistamos nos decía, con sencillas palabras:

—No siempre la vida de Texas, desde su separación de la República Mexicana, y su anexión a los Estados Unidos, ha sido tan tranquila como hoy, ni siempre se ha gozado en estas tierras, de las comodidades para el vivir y para el viajar y el comercio, de la paz absoluta, de la seguridad invariable de que hoy gozamos todos, desde el más humilde hasta el más poderoso.

Hubo épocas en que la vida en los pueblos fue difícil por demás, difícil por la malaria y por los pelispos, por que a cada lleno de luna, los indios aparecían sin que nadie supiera dónde venían, en cabalgada silenciosa que sorprendía a los pueblos dormidos, y una vez sobre los inermes pobladores, se abalanzaban y sorprendían.

(Pasa a la 6a. Col. 8a.)

A MEXICO LE CONVIENE LA NEUTRALIDAD

Esa es la opinión en las altas esferas del Gab. americano. De una manera semi oficial declararon que los EE. UU. no desean que México entre a la guerra

Teniendo a México como aliado, Francia e Inglaterra no podrían hacer las vigorosas reclamaciones que a su tiempo harán

WASHINGTON, Julio 10.—Los informes que se han venido publicando por la prensa de este país, acerca de que México está a punto de romper sus relaciones con Alemania, han dado lugar a que se haga una declaración autorizada de que tal acción, en caso de llevarse a efecto, no estaría basada en alguna influencia o consejo de los Estados Unidos. Ninguna sugerencia o insinuación de un apoyo activo de la actitud americana se ha hecho a México, con excepción de la nota general dirigida a todos los países neutrales por el gobierno de los Estados Unidos, en la que se les pide que rompan sus relaciones con Alemania.

Se ha dejado entender de una manera clara que no obstante que los Estados Unidos recibirían con satisfacción la adhesión de sus amigos a la actitud que ha asumido el respecto de México, por lo que toca a México, sería mejor, en opinión de muchos funcionarios, para servir los intereses de ambos países, que mantuviera su neutralidad.

El Embajador Flet her dijo al Secretario Lansing, según se supo aquí hoy, que a pesar de alguna mejoría que ha habido en los asuntos mexicanos, todavía hay mucho que preocupar a los Estados Unidos en esta república. Esta circunstancia se considera de suma importancia, porque una ruptura con Alemania daría a México oportunidad de obtener dinero y colocar a los Estados Unidos en una posición más o menos obligada para con este país.

Considerase posible que México no podrá arreglar sus dificultades antes de que la guerra europea termine y si se convierte en un aliado de los Estados Unidos y los países de la entente, los gobiernos de esos países, especialmente Francia e Inglaterra, se verán obligados con el de México y no podrán ejercer la dura presión que harán cuando comiencen las reclamaciones de los perjuicios que los nacionales han recibido durante la revolución.

PABLO GONZALEZ CARRANZA SE NEGABA A DEVOLVER LO INCAUTADO

LA ASOCIACION DE CANADEROS LE VA A DAR UN BANQUETE

No se sabe, en definitiva, el objeto que lo trae a los Estados Unidos

Las versiones propagadas acerca de la llegada del general carrancista Pablo González, a esta ciudad, se han confirmado solo en parte. No fue cierto que González estuviera en esta población, ni de incógnita, ni de otra manera como lo decía el rumor de la calle, ni tampoco que hubiera llegado a la ciudad de Laredo, Texas, y que permaneciera allí en unión de su familia.

Según informes que pudimos recoger ayer en las oficinas del Consulado Mexicano, en esta localidad, sabemos que González debió haber llegado ayer a Laredo, en el viaje que tiene proyectado hacer a algunas importantes ciudades de los Estados Unidos, que probablemente hoy llegará a San Antonio, a donde ha sido invitado por la asociación de ganaderos, para ofrecerle un banquete y darle una recepción de parte de todos los miembros de la poderosa agrupación.

Las autoridades de Laredo le harán honores.

En las oficinas consulares de México, nos informaron que las autoridades civiles y militares de la ciudad de Laredo, Texas, han hecho una formal invitación a Pablo González, para que sea huésped de honor de aquella localidad, y tributarie los honores.

(Pasa a la 6a. Col. 6a.)

NO PREOCUPA A EE. UU. LA CUESTION DEL PETROLEO DE MEX.

Ni Carranza ni Pelaez ponen dificultades insuperables para proporcionar el mencionado combustible

WASHINGTON, Julio 10.—La Secretaría de Estado no se halla alarmada por el giro que ha tomado el problema petrolífero de México, con motivo de las extraordinarias contribuciones que el gobierno de Carranza ha impuesto sobre las compañías extranjeras.

Las negociaciones iniciadas para aligerar la carga que el gobierno de México ha echado sobre las empresas extranjeras que explotan en los terrenos petrolíferos, continúan llevándose a

bo y se espera que se llegue a una solución satisfactoria para los intereses de las dichas empresas.

Se ha llamado la atención hacia el hecho de que hace un año próximo pasado, Carranza amenazó con proceder a la confiscación de las propiedades mineras de extranjeros en México, si no cumplían con las nuevas disposiciones de la Secretaría de Hacienda relativas a las contribuciones

y a la venta al por mayor de esas propiedades, pero la amenaza nunca fue efectuada.

Si solamente este hecho diciéndose que hay una gran diferencia entre "amenazar" y la "ejecución".

En otra parte, se toma en debida cuenta que Carranza solo tiene el "control" en Tampico y Turpan. El resto del territorio petrolífero se halla en manos de general Pelaez, con quien los egipcios y los americanos

For the benefit of our subscribers and others who wish to purchase additional copies of the Greater San Antonio book we have established a book sales office at No. 511 Sixth Street. E. P. Bickenbach, Sales Manager

Men and Women of Greater San Antonio

If you are interested in the progress of your town—in greater personal prosperity—support the work now being done by the Higher Publicity League of Texas, on their new co-operative plan in conjunction with the most potential channels of judicious publicity ever used in America. We offer you a definite, concrete advertising proposition under which you will receive maximum benefits from minimum outlay—also your town and State.

Higher Publicity is a strictly business proposition. Treat it so. In no other business in the world will “KNOWING HOW” play so important a part between progress and stagnation—profit and loss.

Advertising propositions are as plentiful as the sands of the sea. Resultful ones for the advertiser are as scarce as the Pearls it contains. By putting this new system of Co-operative Publicity in operation throughout the United States, the HIGHER PUBLICITY LEAGUE OF TEXAS is performing an economic service for every citizen in San Antonio and deserves the earnest attention and enthusiastic co-operation of all individuals, corporations and civic Leagues who are interested in the welfare of their town.

Do you wish to become a “LIVE WIRE” and aid in obtaining publicity of the right kind for your city that counts and derive maximum personal prosperity from minimum individual efforts or financial outlay? Then be quick in your support of the HIGHER PUBLICITY LEAGUE’S work and quick will be your reward.

Please remember that the HIGHER PUBLICITY LEAGUE OF TEXAS has some real publicity experts on its staff who are permanently located among you and who are devoting their entire time and energies to the work for your benefit and for the commonwealth. They operate in conjunction with travel bureaus, steamship lines, the press and proven periodicals.

The name of their publication is “GREATER SAN ANTONIO, THE CITY OF DESTINY AND OF YOUR DESTINATION,” and the facts this Higher Publicity book presents about San Antonio are to encourage men to investigate the opportunities and to lend their brains and money to the development of the great natural wealth in which the San Antonio territory abounds.

The profits to the individual will be the increased business growing out of the permanent prosperity of the City and State. The success of many sections of Texas now depends upon the greater development of their natural resources and to bring these more into the public eye in the right way by scientific and judicious publicity is the first consideration of the HIGHER PUBLICITY LEAGUE OF TEXAS. The path to co-operation has been made easy and plain by scientific publicity experts, who are conducting the “GREATER SAN ANTONIO” propaganda.

HIGHER PUBLICITY is the real yeast in the bread of improvement and a never failing factor for good results. It is absolutely infallible. In proof we can refer you to some brilliant examples of the exact and effective working of the system. Help do something to bring our City more into the public eye in the right way. This is the crucial moment for San Antonio, but make the start today.

Our publication, “GREATER SAN ANTONIO, THE CITY OF DESTINY AND OF YOUR DESTINATION,” together with our co-operative Publicity System and Service, is the greatest medium of publicity our people ever had the opportunity to support.

HIGHER PUBLICITY LEAGUE OF TEXAS

E. A. LUCK, Director of Publicity

SAN ANTONIO, TEXAS
